

Advancing Corporate UX Maturity: Making the Business Case

John Bowie

1982 1988 1992 2002 2004 2005 2008 2012 2020 2022

john@johnscottbowie.com

Traditional Business Case...

News of bad customer service reaches more than twice as many ears as praise

For every customer who bothers to complain, **26** other customers remain silent.

It takes **12** positive experiences to make up for one unresolved negative

Americans tell an average of **9** people about good experiences, and tell **16**
(nearly two times more) people about poor experiences.

1 You Must Tell Stories

Preaching Doesn't Work

Why is UCD Critical to GEHC's Success?

Traditional Approach

- Technology driven
- Component focus
- Limited multidisciplinary cooperation
- No specialization in user experience
- Some competitive focus
- Development prior to user validation
- Product defect view of quality

UCD Approach

- User driven
- Solutions focus
- Multidisciplinary teamwork
- Specialization in user experience
- Focus on competition
- Develop only user validated designs
- User view of quality

Teaching Doesn't Work

Are You UX'd?

Workshop Goal:

Begin the journey toward a customer-obsessed culture by establishing a common understanding of User Experience Design and how everyone in EAG shares responsibility for delivering a world-class user experience.

What is UX Design?

- A brief history of user experience design – UX defined and demonstrated – why UX is mission-critical

The Chasm

- The mythical "user" – closing the chasm between what people know and need to know to get results

Governing Dynamics

- A model of human-technology collaboration – designing the "user component" in the system

Research

- Start of class exercise: mapping the user experience of reserving a conference room

Analysis

- Exercise continued: finding pain points, moments of truth, and road blocks in the user experience

Design

- Conclusion of the exercise: redesigning the user experience to ensure user success and delight

Vision Prototypes

Administrator

Ken Schneider

Profile

- Deputy Superintendent for Curriculum and Instruction
- Long career as a teacher, then curriculum director
- Works in a major urban district
- Leads a small staff of specialists

Primary Goals

- Meeting district accountability standards.
- Connecting individual teachers, schools, and the district.
- Making sense of a number of data sources.
- Making good buying decisions for the district.
- Showing administrators that the decisions I've made were smart.

Vision Prototypes

Administrator

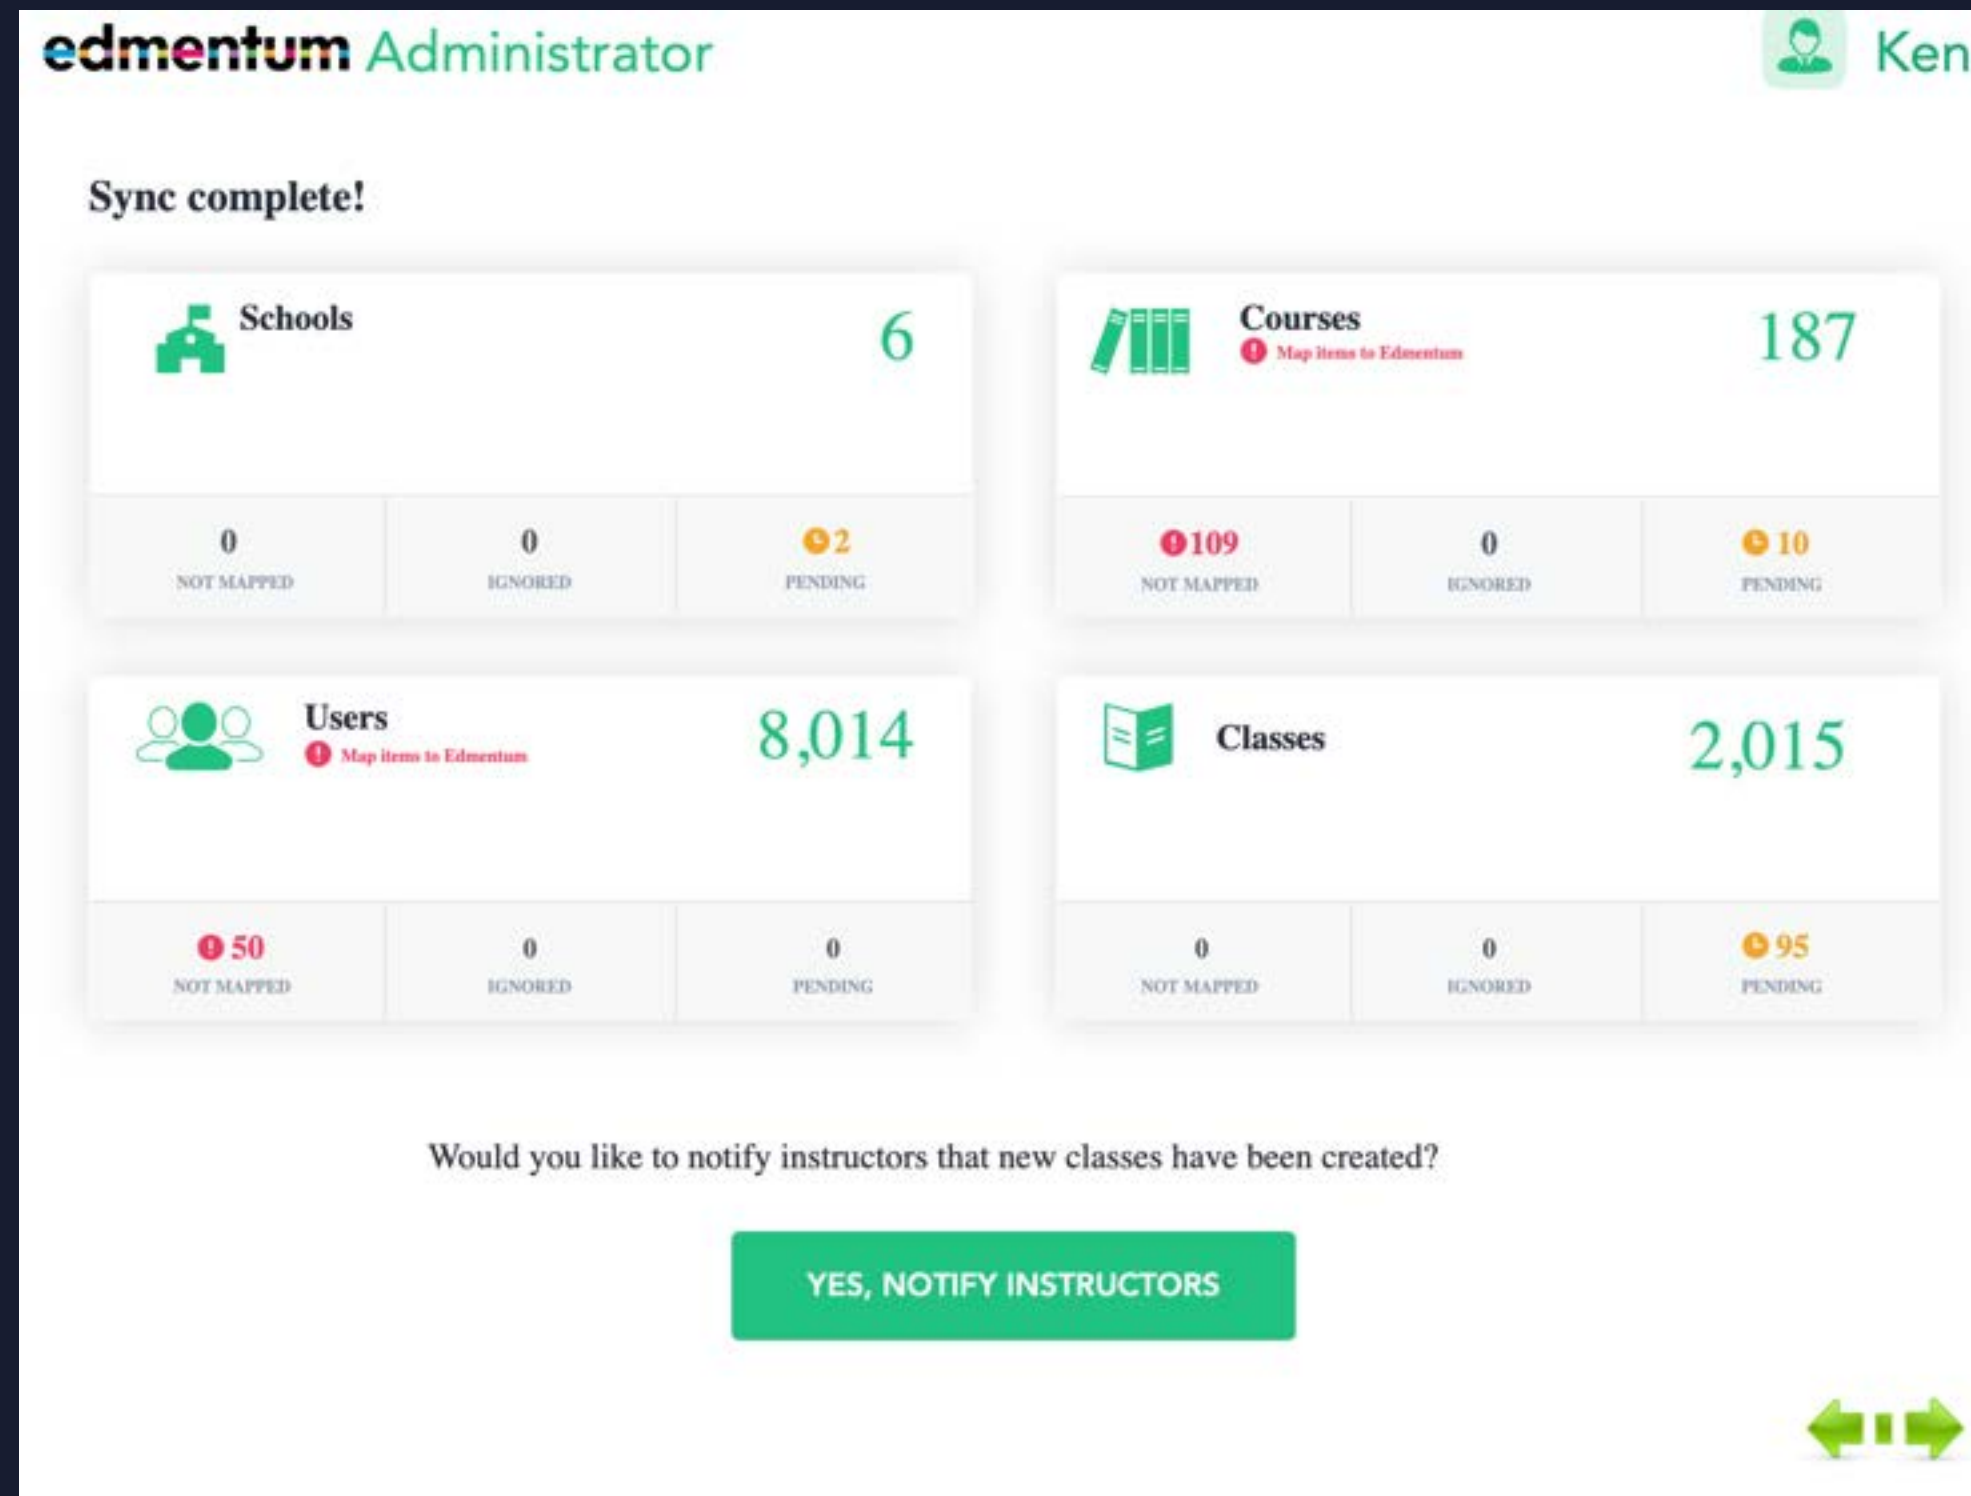

Ken Schneider

School starts next month. Time to set up the Edmentum Outcomes Platform for the school year.

Vision Prototypes

Teacher

Lisa Sandy

Profile

- Middle school math teacher
- Teaching for 8 years
- A large classroom: 34 Kids
- Comfortable with technology, but as a consumer, not an engineer.

Primary Goals

- Little daily victories: they are motivating.
- Meeting each students academic and emotional needs.
- Getting my kids to pass those state assessments
- Communicating progress and growth, to parents, kids, administration.
- Truly engaging these kids

Baseline UX Maturity

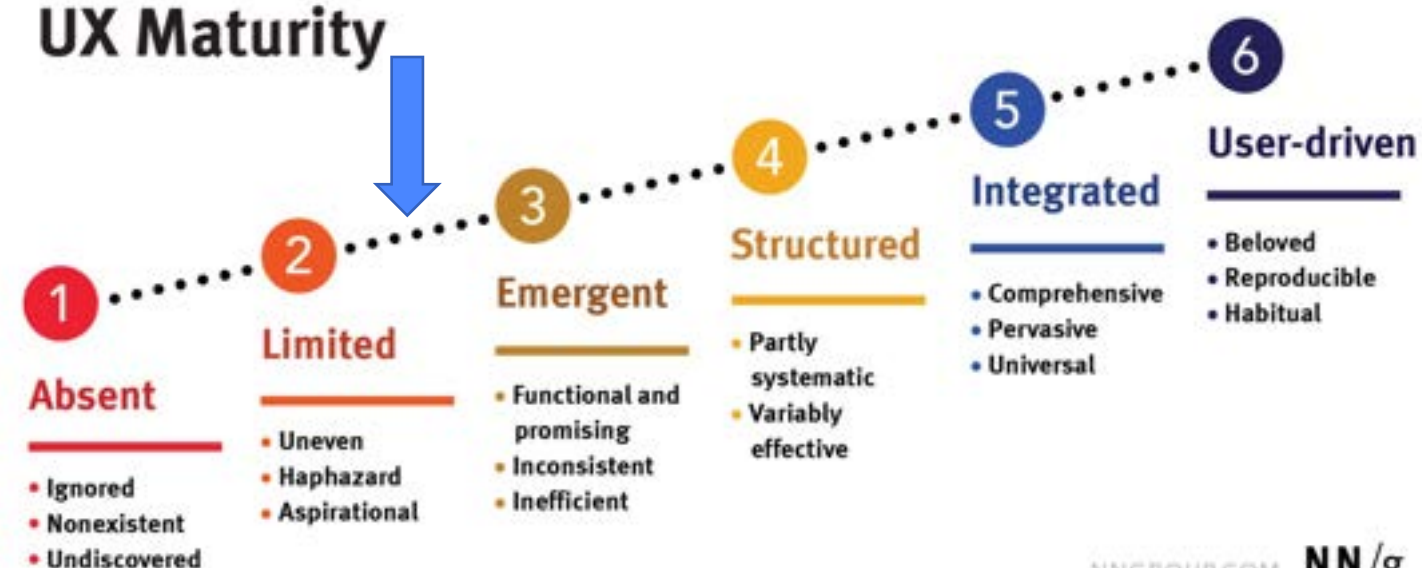

The UX-Maturity Model

The UX-maturity model provides a framework to assess each organization's UX-related strengths and weaknesses. We can use that assessment to determine which of the 6 stages an organization currently occupies. Further, this model provides insights about how an organization can increase its UX maturity.

The 6 stages of UX maturity are:

1. **Absent:** UX is ignored or nonexistent.
2. **Limited:** UX work is rare, done haphazardly, and lacking importance.
3. **Emergent:** The UX work is functional and promising but done inconsistently and inefficiently.
4. **Structured:** The organization has semisystematic UX-related methodology that is widespread, but with varying degrees of effectiveness and efficiency.
5. **Integrated:** UX work is comprehensive, effective, and pervasive.
6. **User-driven:** Dedication to UX at all levels leads to deep insights and exceptional user-centered–design outcomes.

Stages of UX Maturity

After One Week of Training...

User-Driven Project

“

I have to choose ADMINISTRATION, choose CLASS, choose STUDENT...

It just seems like it's longer and convoluted than it needs to be.

I just want to be able to click on a student and have a choice of things I can do with that student.

I can edit the student,

I can delete the student.

I can manage the student's hours or whatever.

That's just an idea.

She just told us just last week how to do this.

And then it comes time a few days later to actually do it and we're both like: Phhhhttt! It's gone.

That's why we're having this meeting to write some notes down.

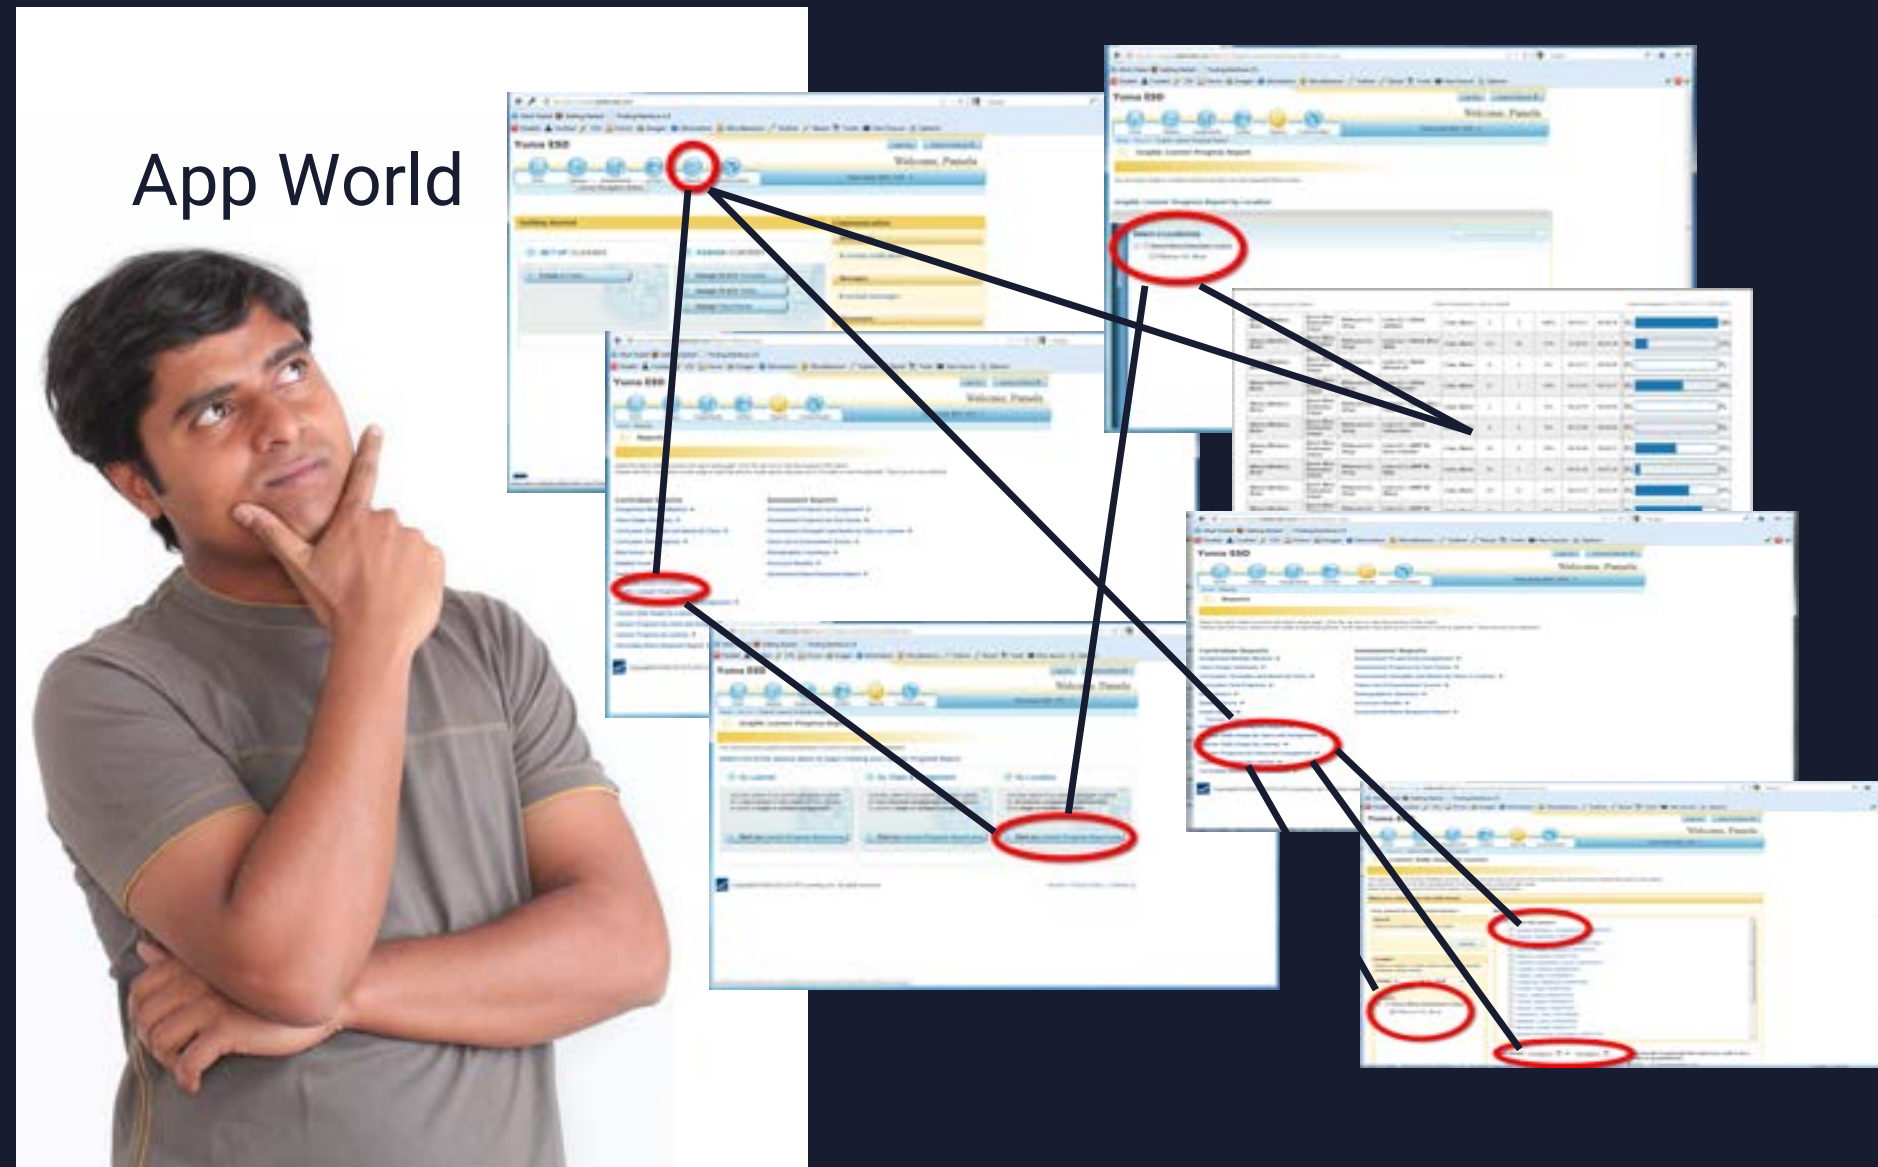

”

John Scott Bowie / JUL 4, 2022 / [1 comment](#)

Accelerating UX Maturity With A Breakthrough Project

 17 min read [UX, Design, Workflow, User Research](#)

 [Share on Twitter, LinkedIn](#)

QUICK SUMMARY • In this article, John Scott Bowie shares the story of 40 years of attempts to advance corporate UX maturity that — after numerous initiatives with marginal results — culminated in a breakthrough project that accelerated a company's UX maturity from “Emergent” to “User-Driven” in less than a year.

You can incrementally advance corporate UX maturity by conducting user research, designing new features, and repairing existing ones while emphasizing how your work improves the user experience. Experts agree this approach is effective, but it may take long before the company truly groks and values UX. To accelerate culture change, you must find and solve a big unmet user need. But an innovative solution is not enough; you must also successfully navigate UX politics to see your project through to

ABOUT THE AUTHOR

John is the author of *Navigating the Politics of UX*, a compendium of strategies and stories from his 40 years' experience in UX. He has served as a UX engineer, ... [More](#)

And Coming This Fall...

The Intrapreneur's Ten Commandments

<https://intrapreneur.com/the-intrapreneurs-ten-commandments/>

1. Build your team, intrapreneuring is not a solo activity.
2. Share credit widely.
3. Ask for advice before you ask for resources.
4. Underpromise and overdeliver — publicity triggers the corporate immune system.
5. Do any job needed to make your dream work, regardless of your job description.
6. Remember it is easier to ask for forgiveness than for permission.
7. Keep the best interests of the company and its customers in mind, especially when you have to bend the rules or circumvent the bureaucracy.
8. Come to work each day willing to be fired.
9. Be true to your goals, but be realistic about how to achieve them.
10. Honor and educate your sponsors.

Never Stop
Asking...

**WHAT'S
NEXT?**

Thank you!
